Purpose:

To ensure that all practicing registrants of the College understand their professional obligations by ensuring they receive education on jurisprudence related to the practice of Medical Laboratory Technology as part of the initial registration and/or renewal process with the College.

Definitions:

Jurisprudence-The study of the legislation (Act, Regulations, Bylaws) standards and code of ethics that govern the practice of a regulated health profession

Policy:

Mandatory training on jurisprudence provides each new registrant with education on the legislation (Act, Regulations, Bylaws), standards of practice and code of ethics that govern the practice of Medical Laboratory Technology in Manitoba. Regularly scheduled refresher training ensures existing registrants are aware of their professional obligations under the Act.

- 1 All new applicants for registration with CMLTM in the Active and Conditional categories will be required to successfully complete the Jurisprudence learning module prior to a certificate of practice being issued.
- 2 New applicants will also be assigned the Social Media Awareness – Pause before you post and must successfully complete this learning module within 3 months of registration.
- 3 The jurisprudence module will become a renewal requirement for all registrants in Active and Conditional categories during the 2019 renewal process. The Social Media Awareness module will become a renewal requirement for the 2021 renewal season. All modules assigned must be successfully completed before a certificate of practice will be issued.

- 4 Pass marks for all learning modules have been set at 60%. New registrants and current practitioners who are unsuccessful on a learning module must contact the office to have it re-assigned
- 5 All Active registrants are required to refresh their jurisprudence knowledge every five years or earlier as approved by the College Council.
